Y. ESWAR

Data Science & Machine Learning

Hyderabad, India | +91-9550959324 | eswaryadav8543@gmail.com | github.com/ishuu9837 | linkedin.com/in/eswar854 | crypton-alpha.vercel.app

Professional Summary

M.Tech Data Science candidate (CGPA 8.95) and B.Tech Computer Science (AI) graduate with hands-on experience across the full data-to-deployment pipeline: exploratory data analysis, model building (deep learning, few-shot learning, LLM fine-tuning), and shipping working REST APIs and web applications. Comfortable moving between analytical work (EDA, evaluation, reporting) and applied ML/research work, with a consistent habit of documenting methodology and validating results rigorously.

Technical Skills

Languages: Python, SQL, JavaScript, HTML/CSS

ML / AI: Deep Learning, CNNs, Autoencoders, Few-Shot Learning, LoRA/QLoRA Fine-Tuning, Anomaly Detection, Model Evaluation

Frameworks / Libraries: PyTorch, TensorFlow/Keras, Scikit-learn, OpenCV, NumPy, Pandas, Flask

Data & Databases: Exploratory Data Analysis, MongoDB, MySQL, REST API design & integration

Tools & Platforms: Git/GitHub, Vercel Serverless, Jupyter, Google Colab

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Software Design

Education

GITAM School of Technology, Hyderabad, India *2025 – 2027*

M.Tech in Data Science | CGPA: 8.95

Parul Institute of Engineering and Technology, Vadodara, India *2021 – 2025*

B.Tech in Computer Science & Engineering (AI) | CGPA: 7.13

Projects

EduSentinel — Anomaly Detection System *Python, PyTorch, Flask, REST API*

- Built a complete anomaly-detection pipeline from an open-ended problem through to a deployed, real-time inference REST API.
- Achieved 90.43% accuracy and 99.40% ROC-AUC through structured evaluation and validation across multiple training runs.

Fine-Tuning Llama 3 for Domain-Specific Q&A *Python, PyTorch, LoRA/QLoRA, Transformers*

- Fine-tuned Llama 3.2 using LoRA/QLoRA for a finance-domain question-answering task, adapting the base model to domain-specific queries while keeping trainable parameters small.
- Evaluated adapted model outputs against baseline responses to assess domain accuracy and response quality.

Few-Shot Learning for Medical Image Classification *Python, PyTorch, ResNet18, ProtoNets*

- Reproduced and extended a few-shot meta-learning model (Prototypical Networks, ResNet18 backbone) for breast histopathology and brain tumor (BraTS) image classification as part of M.Tech research.
- Investigated low-data classification performance where labeled medical imaging data is scarce, as groundwork for a research paper.

Image Colorization — Generative Deep Learning *Python, PyTorch, TensorFlow, Git*

- Co-developed a U-Net-based generative deep learning model to colorize grayscale CIFAR-10 images, using Git-based version control and structured peer code review.
- Trained and evaluated the model with iterative implementation feedback to improve code quality before merging.

Research & Publications

- **Abnormal Learning Behaviour Detection Using Deep Autoencoders** — M.Tech research paper, presented at GITAM University Seminar.
- **Real-Time Face Recognition using OpenCV and LBPH** — Published on ResearchGate (Dec 2024); anti-spoofing safeguards designed by reasoning through real attack scenarios.

Certifications & Availability

- Professional Certification in Data Science & AI — Intellipaat (2025)
- Open to relocation for full-time or internship roles anywhere in India.
